DESCRIPTION

A schedule is required to arrest deterioration and to ensure that aging facilities remain suitable for instruction on an approximate 30-year cycle. The Board of Education strongly supports the upgrading of facilities through comprehensive modernizations to replace major building systems and to bring schools up to current educational standards. MCPS has designed an instrument to assess the condition of the schools (FACT) as they reach 30 years old and rank them in order of need. Schools will be planned according to the priority listing in the FACT survey. The approved project provides for replacements/modernizations as adopted in the Amended FY 2001-2006 CIP. This project includes funds for schools with scheduled expenditures in FY 2004 and beyond. The project includes 10 elementary, three middle, and two high schools. It is anticipated that at some point in the future, holding facilities will require a full modernization for continued use.

As feasibility studies are completed and architectural planning is scheduled, individual schools will move from this project to the Current Replacements/ModernizationsPDF No. 926575. The funding shown in FY 2007 and beyond is for fiscal planning purposes. Asbestos costs are included in school replacement/modernization projects based on a square foot average. On May 1, 2001, a 90-day moratorium on bidding MCPS construction projects was implemented due to rapidly escalating construction costs. In FY 2003, due to fiscal constraints, all future modernization projects were delayed.

An amendment to the FY 2003-2008 CIP was approved to move one high school from this project to the Current Replacement/Modernizationproject. As part of the Board of Education's adopted FY 2004 Capital Budget and Amendments to the FY 2003-2008 CIP, planning expenditures for some future modernizations were shifted to more closely couple these planning expenditures with approved project construction schedules. The realignment of planning expenditures will not affect any project completion schedule. Due to fiscal constraints and delay in the elementary school modernization projects in the adopted FY 2005-2010 CIP, only one middle school modernization project moved from this project to the Current Replacement/Modernizations Project.

FISCAL NOTE

State Reimbursement: Reimbursement of the state share of eligible costs will continue to be pursued.

The impact tax reflected in the expenditure schedule shown above is applied to the addition portions of some modernizations within this project.
